

# SENTINEL™ RELEASABLE PLATE CARRIER SYSTEM

THE WORLD'S FIRST QUICK RELEASE BALLISTIC CARRIER AND SUSPENSION SYSTEM!

The Sentinel™ Releasable Plate Carrier System (RPC) is a lightweight, plate and armor carrier that provides superior mobility.

- ONLY carrier that incorporates a ballistic suspension system (CASS).
- Best-in-class cut-away system.
- Ancillary armor protection in a single pull cut-away system.
- Ability to jettison all components is a game changer for the protective products industry.

Comfort Armor Suspension System (CASS) is designed and engineered to allow the operator to carry increased loads with reduced fatigue and increased ballistic protection. The CASS moves the load from the back and shoulders to the waist and hips allowing for increased operational endurance, reduction of lower back injury and fatigue. The CASS fits easily inside the back panel of the RPC and can be removed at any time.

Vest cuts away remaining intact to allow for medical access and ease of equipment recovery.

Dual position cut-away handle with positive-stop release.

Integral cable cut-away system.  
Cable never detaches from system.

Multiple adjustment points for proper fit and function.

Fail-safe release system.

Enhanced version of combat proven 6094 plate carrier.
